ABOUT

Born & raised in Saltillo, Mexico. Have a Computer Science bachelor's degree by National Technological Institute of Mexico, and a master's in business administration by TecMilenio University.

Along my 5 years of experience in technology I have had the opportunity to work in 3 different countries for some of the biggest consulting firms worldwide, impacting some of the most important companies around the globe on industries such as travel & communications, energy, and health & insurance. I have had the opportunity to work face to face with my clients to add them value during the entire software development life cycle. I have had the grace of training and growing teams.

Twice certified as Appian practitioner. Twice certified in Agile Methodologies and Certified in Project Management Methodologies. Focus on the use of effective code standards on all my endeavors. Have experience with Appian, C# and several technologies of Microsoft platform such as VB, VBA, T-SQL, WCF, WPF & Azure as well as MVC and other distributed architectures for software development.

EXPERIENCE

TECHNICAL LEAD

CECOACHING • SANTANDER BANK (MEXICO)• OCT 2020 – CURRENT

Development of BPM solutions for the Management and Monitoring department at the Risks area of the bank. This system includes multiple integrations with legacy systems includes the automation in Appian of all the business processes required to manage and control an enterprise client of the bank. The application allows risk analysts to follow up the clients as well as change different scores of the clients based on its risks and liabilities as well as to manage the financial statements and all financial data of the client. later a risk committee approves or denies the changes performed by the analyst.

SOFTWARE ENGINEER

HEXAWARE • SITA (UK) • JUL 2019 – OCT 2020

Development of a product for electronic visa for a UK client that includes the automation in Appian of all the business processes required to issue a visa such as immigration, security, and document check. The application allows a user to start a visa application from an integrated frontend in Drupal and provide all required evidence based on the requested visa type, later a group of security officers and visa officers continue the process in Appian till the electronic visa is finally issued.

SOFTWARE ENGINEER

HEXAWARE • BPM LAB (INDIA) • JAN 2019 – JUN 2019

Working for Hexaware´s BPM Lab designing innovative solutions such as an application for loan origination that includes all the steps from taking a loan application up to approve it and notify both borrowers and lenders through internal feeds. The application allows borrowers to take an application form, and then it is processed, evaluated and pre-approved or denied by the bank based on the inputs from the borrower.

2016

EXPERIENCE (CONT.)

APPLICATION DEVELOPMENT ANALYST
ACCENTURE • INTEGRYS (MEXICO) • JAN 2018 – DEC 2018

A billing solution for energy companies was maintained and enhanced. The process is to resolve defects, extend the functionality of the same by adding new business requirements and migrate the whole legacy application from C++ to C#. Work alongside Minneapolis functional team and product owners in close collaboration to ensure the quality of the product.

ASSOCIATE SOFTWARE ENGINEER
HEXAWARE• AIG (MEXICO) • JAN 2016 – JUL 2017

Worked alongside Houston & Chennai teams for supporting and maintaining the entire set of enterprise solutions for human resources global department of an important health and insurance company. Bug-fixed, hot fixed and supported Appian applications such as employee performance management system, tuition reimbursement system, enterprise bus system as well as many other integrations with other enterprise solutions.

JUNIOR DEVELOPER
APTIV• TLL (MEXICO) • JUN 2015 – DEC 2015

We worked in the development of a production tracking system for important manufacturing client. We developed desktop and batch applications for tracking the state of single part number along the entire production process to allow the clients to be able to estimate the current state of the production plan.
